ON A DEVELOPMENT OF THE EASTERN REGIONS OF THE RUSSIAN FEDERATION

Shepelev I.G.

professor of chair «Economics, Management and Investment»,

South Ural State University

-mail: shepelev1931@mail.ru

Abstract

The article represents the analysis of the demographic dynamics of Siberia and Far East. It was determined that the eastern regions population's decrease associated with the action of internal migration flows from East to West. It is important to provide the construction of public and private high-tech engineering systems based on innovative technologies assumed in the framework of realization national priority of Siberia and the Far East development, along with the grand privileges to attract businesses to the regions and development of eastern region infrastructure. The development like this can remove the threat of economic and territorial security.

Keywords: *demographic flows, conditions of residence, infrastructure, state politic of region development, grand privileges, the organization of Russian-language labor inflow*
